ETHIN

Building Industry-Ready Talent

Technical & aptitude training for colleges and corporates

AI/ML | Blockchain | Cyber Security | DevOps | Robotics | SAP | Full Stack | AR/VR

Partnership Pitch Deck

ethin.in

The Skill Gap

Why institutions and companies need a training partner

Graduates not job-ready

Degrees cover theory; employers expect hands-on coding, problem solving and communication.

Technology moves fast

AI, agentic systems, cloud and AR/VR need continuous upskilling, not one-time courses.

Placements & productivity

Colleges need better placement outcomes. Companies need teams productive from day one.

Ethin.in closes this gap with structured, project-based, outcome-driven programs.

About Ethin.in

Who we are and what we do

Ethin.in is a technology training company delivering practical, industry-aligned programs to engineering colleges, universities and corporate teams.

Practical first

Live coding, labs and capstone projects in every program.

Flexible formats

From 1-week sprints to 1-year programs, on campus or online.

Industry mentors

Trainers with real project and enterprise experience.

Measurable results

Assessments, progress reports and placement-readiness tracking.

Our Training Tracks

13 domains, one partner

Aptitude & Reasoning
Quant, logical, verbal, placement prep

AI & ML
Core ML, deep learning, real projects

Agentic AI & AI Integration
LLM apps, agents, workflow automation

AI / ML Ops
Model deployment, monitoring, pipelines

DevOps
CI/CD, Docker, Kubernetes, cloud

Cyber Security
Ethical hacking, network and app security

Blockchain & Crypto
Smart contracts, Web3, cryptocurrency basics

Robotics
Sensors, automation, embedded and robot control

Python & Java DSA
Algorithms and coding-round mastery

SAP Training
Enterprise modules for career-ready consultants

Full Stack & MERN
MongoDB, Express, React, Node, deployment

Mobile App Development
Cross-platform apps, UI to store release

AR / VR Technologies
Immersive apps for education and industry

Custom tracks on request
Tell us your tech stack or role and we will design a tailored program.

What Learners Gain

Core outcomes by track

Aptitude & Reasoning	Speed maths, puzzles, logical and verbal ability, mock tests
AI / ML / Agentic AI	Python for AI, ML models, LLM integration, building AI agents
AI/ML Ops & DevOps	CI/CD, containers, cloud deployment, model monitoring
Cyber Security	Threats, ethical hacking basics, secure coding, defence practice
Blockchain & Crypto	Ledger concepts, smart contracts, Web3 apps, crypto fundamentals
Robotics	Sensors, actuators, programming and automating robots
Python / Java DSA	Arrays to graphs, DP, complexity, coding interview practice
SAP	Business processes, module fundamentals, hands-on exercises
Full Stack / MERN / Mobile	Frontend, APIs, databases, mobile apps, deployment
AR / VR	3D basics, interaction design, building immersive apps

Flexible Program Durations

Choose the depth that fits the batch

1 Week

5 days

Quick workshop on one skill

10 Days

Intensive

Bootcamp with a mini project

1 Month

Short course

Focused skill-building

3 Months

Track program

Projects and assessments

6 Months

Advanced

Deep training with capstone

1 Year

Career program

Multiple tracks, placement-ready

Weekly-based delivery

Sessions scheduled weekly as per the signed agreement: weekday, weekend or intensive-sprint formats.

Custom durations and hybrid (offline + online) modes available on request.

Ethin AI Business Automation Software

Data in, actions out: automated by AI

DATA
CSV / SQL files

▶

AI ENGINE
Reads, calculates, decides

▶

AUTO ACTIONS
WhatsApp, Email, Calls

Business Intelligence
Dashboards and insights from your data

College Documentation
Manage records, letters and reports

Auto WhatsApp
Messages sent automatically from CSV / SQL data

Auto Emailing
Personalised bulk emails triggered by data

Auto Calling
Automated calls for reminders and follow-ups

Vendor Calculations
Invoices and amounts computed automatically

Engagement Models

Built around a signed agreement

For Colleges & Universities

- Curriculum aligned to semester and placement calendar
- Batch-wise training with trainer and lab support
- Periodic assessments and placement-readiness reports
- Faculty enablement and student certification

For Corporates

- New-hire onboarding and upskilling programs
- Role-based tracks: developer, data, SAP, mobile
- Customised content on your tech stack
- Progress tracking and manager-level reporting

Our Learning Approach

From concept to portfolio

1. **Assess** — Skill baseline test
2. **Plan** — Custom roadmap
3. **Train** — Live expert sessions
4. **Build** — Projects and labs
5. **Evaluate** — Tests and feedback
6. **Certify** — Certificate and report

Every learner finishes with working projects, assessment scores and a portfolio to show employers.

How to Partner With Us

Simple path from discussion to launch

1 **Discovery call**

Understand goals, batch size, current skill level

2 **Proposal**

Track selection, duration, schedule and deliverables

3 **Agreement**

Sign the MoU / contract with agreed terms

4 **Launch & review**

Kick off training with regular progress reviews

ETHIN

Let's build skilled talent together.

Partner with Ethin.in to make your students and teams industry-ready.
